### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 5-11 and 13 drawn to a species of the claimed invention non-elected without traverse. Accordingly, claims 5-11 and 13 have been cancelled.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The closest prior art of record discloses a method of forming a laminate in which an intermediate layer is formed on a base member and a metal layer is formed on the intermediate layer, see the U.S. Patent to Tawada et al. (U.S. Patent 6,388,301). It is noted that in column 9, line 67, bridging column 10, that Tawada et al. disclose that the rate at which the Ag layer 102 is deposited is varied to allow the Ag layer 102 to have a surface provided with convexities and concavities. However, it is unclear whether Tawada et al. varies the deposition rate during the formation of the Ag layer in each individual example listed in Table 1 or if the deposition rate is changed from one example to another. Additionally, whereas the reference states that the deposition rate is varied,

Art Unit: 2822

Tawada et al. does not expressly disclose *increasing* the deposition rate (or rate of formation). None of the references of record teach or suggest a method of forming a laminate in which an intermediate layer is formed on a base member and a metal layer is formed on the intermediate layer, wherein at an intermediate stage in the step of forming the metal layer on the intermediate layer, the rate of formation (or the rate of deposition) of the metal layer is increased.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Wilczewski whose telephone number is (571) 272-1849. The examiner can normally be reached on Monday and Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
